

## Ms. Baribault's Home Learning Resources

### PK 4-5

1. Board games: Shoots and Ladders (practice counting), and Candy Land (color recognition)
2. ABC videos: on youtube there are lots of videos that can help your child keep practicing their ABCs, such as ABC mouse, Jack Hartman, and Miss Molly
3. Counting to 100: Jack Hartman, Miss Molly and The Singing Walrus have great videos to help your child practice counting to 100
4. Play dough (fine motor skills)
5. Play bingo using letters, numbers and/or colors. (helps with letter, number and color recognition)
6. Color a picture of something fun you did while we were away from school or something you miss about being in school.
7. Read books!
8. Make a sensory bottle: in an empty water bottle or soda bottle fill about halfway with water, then put in about  $\frac{1}{4}$  of a cup of clear glue. Then have fun with it! You can add items such as food coloring, glitter, pom-poms and beads. After adding all of the items add more water so that it almost fills the bottle, leaving room so it can be shaken. Then close the bottle and shake. Close with tape to make sure it stays closed. (We made one as a class and children really enjoyed it.)

Thank you,  
Miss Baribault
